

Reasoning and Interaction at NASSLLI (RAIN)

AUSTIN, TEXAS, JUNE 23-24, 2012

OVERVIEW. Reasoning and Interaction at NASSLLI (RAIN) is a workshop to be held immediately after the upcoming North American Summer School in Logic, Language, and Information (NASSLLI). NASSLLI is a one-week summer school aimed at formally-minded graduate students in Philosophy, Computer Science, Linguistics, Psychology, and related fields, especially students whose interests cross over traditional boundaries between these domains. RAIN follows NASSLLI and features talks by NASSLLI instructors and students whose work is related to reasoning and/or interactions among individuals and groups. RAIN is especially interested in work which is formally-minded rather than programmatic, and yet which is of wide enough interest to present to an interdisciplinary audience.

TOPICS. We invite submission on topics such as:

- models of human reasoning;
- logic motivated by cognitive science;
- rationality and bounded rationality;
- epistemic logic and interactive epistemology
- foundational aspects of game theory;
- modal logic and game theory;
- spatial and temporal reasoning,

Papers on related subjects will also be considered.

REGISTRATION. There will not be a registration fee for RAIN.

LOCATION. RAIN will be held at the University of Texas, Austin. For more on accommodations, please see the NASSLLI web page <http://nasslli2012.com/>.

PAPER SUBMISSIONS/ We invite papers for presentation at RAIN. We are most interested in substantial papers on the topics mentioned above, including presentations of work which has already been published. RAIN will not publish a volume of papers, and so we shall also consider work which is substantial but “in progress.” The submissions should be at most 5 pages, with an optional technical appendix of up to 10 pages, together with a plain-text abstract of 100-200 words. Papers should be submitted electronically to _____.

INVITED SPEAKERS to include

Johan van Benthem	(University of Amsterdam and Stanford University)
Patrick Blackburn	(Roskilde University)
Nina Gierasimczuk	(University of Groningen)
Noah Goodman	(Stanford University)
Hans Kamp	(University of Texas)
Lawrence Moss	(Indiana University)
Valeria de Paiva	(Rearden Commerce, Inc.)

IMPORTANT DATES.

Submission deadline:	March 31, 2012
Acceptance notification:	May 1, 2012
Conference:	June 23-24, 2012
